

# You are cordially invited to the 41<sup>st</sup> Resilience Seminar

Date & Time: Thursday January 26, 2023, 16:45 - 18:15

Venue: Seminar Room E220, Graduate School of Agriculture, Division of Natural Resource Economics, Kyoto University,

Zoom (Registration is required to join the zoom meeting.)

For registration, visit <https://sites.google.com/view/aes-kyotonre/reseliencse-seminar>

## **Title: Weather Shocks, Livelihood Diversification, and Household Food Security: Empirical Evidence from Rural Bangladesh**

**Speaker: Masanori Matsuura, Research Fellow,  
Institute of Developing Economies (IDE-JETRO)**

### Abstract:

Extreme weather shocks have occurred more frequently because of global climate change. Livelihood diversification including crop and income diversification is one of the most remarkable strategies to cope with economic and weather shocks to improve rural livelihood. We investigate the empirical linkages among weather shocks, livelihood diversification, and household food security, exploiting three waves of nationally representative rural household panel data merged with granular climate data in Bangladesh.

### Brief bio:

Mr. Masanori Matsuura worked for a Japanese private think tank as an analyst and obtained MSc in Agricultural Economics at National Taiwan University, prior to joining IDE-JETRO. His research interests lie in the intersection among climate change, food security, health, and rural development.

**Contact Person: Ken Miura, E-mail: [miura.ken.3e@kyoto-u.ac.jp](mailto:miura.ken.3e@kyoto-u.ac.jp), Division of Natural Resource Economics, Graduate School of Agriculture, Kyoto University. This seminar is supported by JSPS Grant-in-Aid for Scientific Research “Food and Nutrition Security: Household and Regional Resilience” (20H00440). This seminar is co-hosted by Kyoto Environment and Development Seminar and Hokkaido Branch of Japan Association for African Studies.**
